

SCULPTURE IN THE CITY

FAMILY ACTIVITY

ACTIVITY 4: SUNCATCHER

KEY:

Glue

Cut

Draw

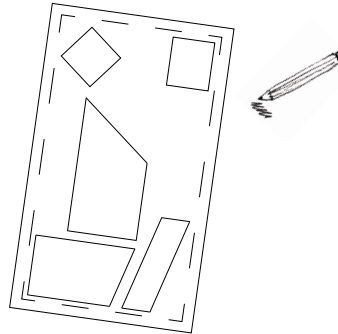

To cut through the shapes, pinch a small bit of the paper and carefully cut into it. Put your scissors through and cut around.

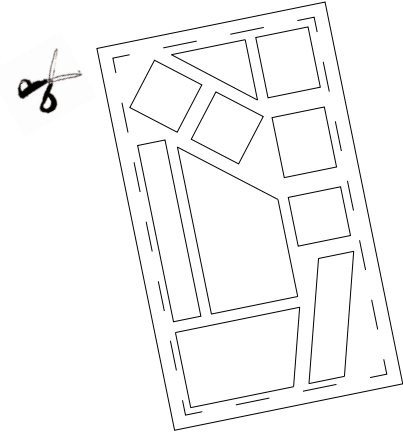

WHAT YOU NEED:

- Toolkit for Activity 4
- Coloured cellophane/translucent sweet wrappers
- Pencil
- Scissors
- Glue/sellotape

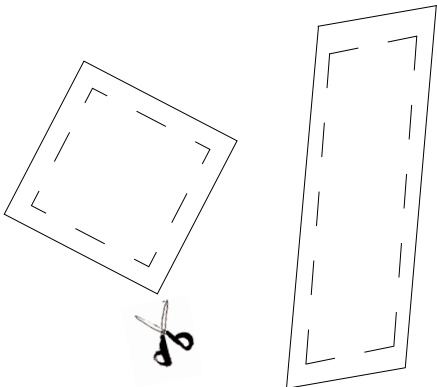

Step 1: Look at the shapes in the sculpture. What are the main shapes you can see? Draw them on your sheet and use the example shapes to help. Make sure to only draw in the dashed line rectangle and leave gaps between your shapes!

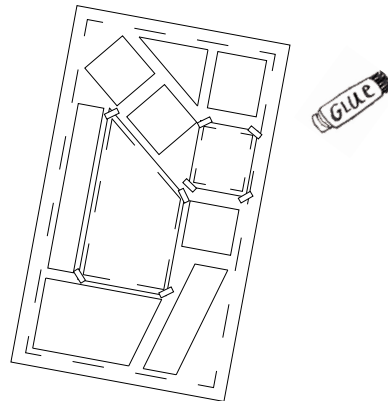

Step 2: Cut out the template along the solid black line. Then cut the shapes to leave a stencil for where your coloured cellophane will go.

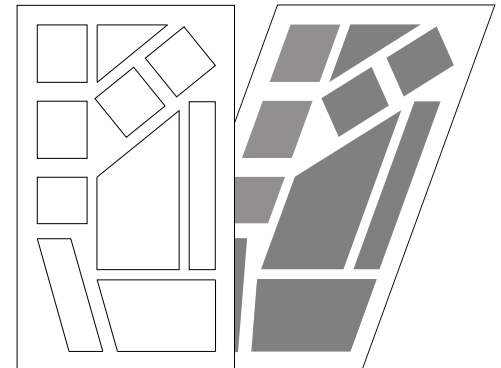

Step 3: Cut out shapes in different coloured cellophane that are similar to your cut out shapes. Make sure they are big enough to be stuck over the holes.

Step 4: Stick each piece of cellophane over the matching shape/hole on the back of your sheet. Repeat process until all the holes are covered. Turn it over when finished.

Step 5: Rest your 'stained glass' suncatcher on the classroom window sill. Observe the types of shadows they make at different times of the day!
